DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 30, 2004 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 16-22 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Paley 1,971,164.

Paley teaches a glass product comprising a main container body 11a with a closed bottom, a secondary container body 19, and a collar 22a. See in particular figure 3. The size of the main container body falls within the range set forth, and the angle of the main body, secondary body and collar fall with the range set forth in the claims.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3727

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 23, 24 and 26-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paley 1,971,164.

Paley discloses the claimed invention except for the angle of the collar to the main container body and the secondary container body being "about 120 degrees". It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the angle of the collar to the main container body and the secondary container body at about 120 degrees, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272,205 USPQ 215 (CCPA 1980).

Response to Arguments

6. Applicant's arguments with respect to claims 1-5 and 16-29 have been considered but are moot in view of the new ground(s) of rejection.
